Nutrition Science Advocacy Education Communication Collaboration

The Nuts for Life aim

To increase the demand for nuts by sharing evidence-based health information to health professionals, media and consumers.

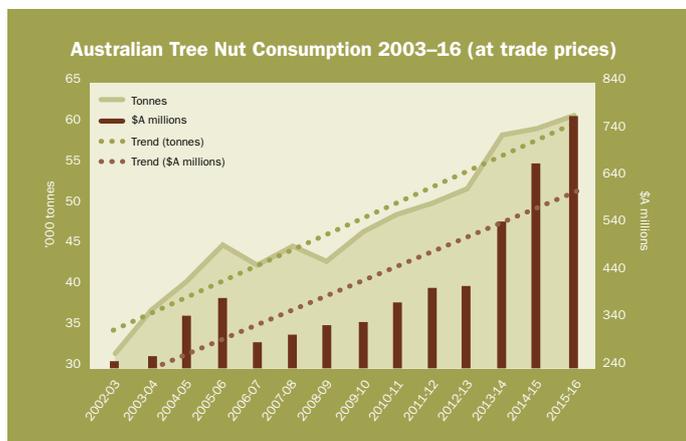

The Nuts for Life message

Regular nut consumption:

- Reduces the risk of heart disease by 30–50%.¹⁻⁵
- Reduces the risk of the most common type of diabetes – Type 2 ~30%.⁶
- Reduces the risk of weight gain and helps with weight management.^{1-5, 10}
- Lowers blood cholesterol.⁸
- Reduces premature death from all causes by 20%.¹²

Nuts for Life real results

Since Nuts for Life started in 2003 Australian tree nut consumption has increased from 32,000 tonnes to 60,440 tonnes in 2015/16 with an increase in value of A\$250 million to \$764 million at trade prices. Achieving our goal of 5% pa increase in nut consumption. This comes from a voluntary industry investment of \$3 million with Australian Government matched funding through Horticulture Innovation Australia of \$1.7 million over 13 years.

The campaign has successfully converted health professionals to supporters of nuts.

Over 95% of GPs are now aware of the role nuts play in heart health and their knowledge on weight has improved over time.¹¹

The limited budget has restricted our ability to convince consumers of this with such impact.

But, we can with your help.

Tree nuts include: almonds, Brazil nuts, cashews, chestnuts, hazelnuts, pecans, macadamias, pine nuts, pistachios and walnuts.

Nuts for Life overview

Nuts for Life was established over 10 years ago in 2003 by the Australian tree nut industry to provide information about the health benefits of regular tree nut consumption.

Nuts for Life is facilitated by the Australian Nut Industry Council in partnership with other members of the Australian Tree Nut Industry (all parts of the supply chain from growers to small nut retailers). It's funded by voluntary contributions from the industry as well as through Australian Government matched funding for R&D activities via Horticulture Innovation Australia..

The dietitians at Nuts for Life are committed to effectively disseminating evidence-based, accurate and up-to-date information on the nutrition and health benefits of nuts.

Nuts for Life goals

The goals of the program are to:

- Identify and communicate the nutrition and health benefits of tree nuts to food regulators, public health advisors, health professionals, consumers and the media.
- Dispel the myths surrounding tree nuts and health especially for weight management.
- Keep contributors to the Nuts for Life program updated with activities, new research and provide support.
- Increase tree nut consumption by 5% pa.

Nuts for Life program highlights

Nuts for Life has been delivering results for the Australian tree nut industry since 2003. Tree nut consumption as measured by trade disappearance data continues to grow at 5% pa. Here's how:

- **Through numerous effective submissions** to FSANZ and other government and public health agencies, such as the NHMRC, on issues such as health claims, core foods, dietary guidelines, food allergy, front-of-pack labelling Health Star Ratings and obesity.
- **2013 Australian Dietary Guidelines** acknowledge the role nuts can play in weight management and cholesterol lowering and recommend adults increase nut consumption by 350% (www.eatforhealth.gov.au).
- **Reaching 56,000 health professionals** (cardiologists, GPs, medical students, dietitians, fitness leaders, naturopaths, home economists and medical writers) with resources, nut samples and personal interaction via 82 health professional conferences and exhibitions.
- **Developing and distributing 200,000 copies of Nuts for Life printed resources** – including 20 fact sheets, two consumer brochures and three literature reviews including the Nut Report *Nuts and the Big Fat Myth* and *The Heart Health SLR summary*.
- **Delivering our quarterly email newsletter NutENews**, distributed to over 3,000 subscribers.

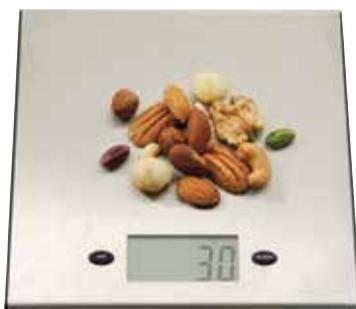

- **Actively participating in the online social-media space** via our Twitter presence @nutsforlife now with around 2,900 followers, facebook.com/nuts4life with 29,060 likes, commencing Instagram @nuts_for_life with 322 followers to date and our annual #nuts30days30ways social campaign.
- **Generating over 4,480 media articles** on nuts and health through public relations, resulting in around 480 million impressions based on circulation figures.
- **Development of the 'Healthy handful' logo** for use on pack and promotional materials.
- **Delivering the Nuts for Life website** (www.nutsforlife.com.au), with some 315,000 unique visitors and 2 million page views over 13 years. The National Library of Australia has recognised the importance of the Nuts for Life website by annually archiving it in July to give librarian access in perpetuity.
- **Conducting 31 Nuts for Life staff workshops on myth busting and labelling, and social media** for the staff members of Contributor companies – over 350 staff members attending. As well as developing “how to make nutrient claims” manuals for each nut type and a “how to get started in social media” manual.

Health evidence

There are now in excess of 500 published scientific research studies to substantiate the positive effect that regular nut consumption has on health. Some of these health benefits include:

- A handful of nuts at least five times a week may reduce the risk of developing heart disease by 30–50%¹⁻⁵ compared to those who don't eat nuts. This is due to the wide range of heart healthy nutrients – healthy fats, fibre, antioxidants, vitamins, minerals, plant sterols and arginine.
- A handful of nuts at least five times a week may reduce the risk of developing Type 2 diabetes by 27%⁶ through causing a low GI effect and improving insulin sensitivity.⁷
- Two handfuls (67g) a day may lower blood cholesterol by 5% and particularly LDL cholesterol by 7%⁸ through healthy fats, fibre and plant sterols regulating cholesterol production.
- Improving the quality of the diet by helping to meet recommended nutrient intakes⁹. The individual nut types contain a variety of nutrients and plant compounds.
- Helping to achieve weight management and reducing the risk of developing obesity^{1-5, 10} due to fats, fibre and protein increasing satiety so controlling appetite and increased fat excretion.

Contributor benefits

- **Participate in the annual #nuts30days30ways social media campaign**
- **Nut Myth Busting and labelling workshops** for your staff so they are up with the latest on nuts and health and they understand labelling requirements.
- **Quarterly email contributor updates** keeping members up to date with activities and research.
- **Access to the contributor-only** password-protected section of the **Nuts for Life website**, with full access to our documents, including:
 - **Biannual market research reports** for health professionals and consumers – contains valuable insights into consumer benefits.
 - **Nut industry statistics reports** gathered annually – contains apparent consumption data for individual tree nuts as well as total consumption.
 - **“How to make nutrient claims” manuals** for each nut type including access to GLHC SLR reports.
 - Materials to assist contributors in managing **nut allergy** business risks: Tree Nut Allergy review and Nut Allergy Issues Management Manual.
 - Past presentations, reports and contributor newsletters.
- **Access to two iPad friendly recipe booklets** – 40 recipes each and over 150 royalty free nut images.
- **Access to Lisa Yates and Belinda Neville, Dietitians**, for presentations and advice on research, regulatory, labelling and nutrition issues.

Nuts for Life management

Since January 2005 the campaign has been implemented and managed day-to-day by Lisa Yates, an Advanced Accredited Practising Dietitian. As well as her professional qualifications and private practice, Lisa has had a long career in food and health public relations and communications. Lisa is supported by Belinda Neville, an Accredited Practising Dietitian with many years of experience in nutrition communications and FMCG marketing, two days a week.

An industry Management Committee oversees the campaign and sets the policies and strategic direction.

The committee members are:

Chris Joyce	Australian Pioneer Pistachio Company – Chair
Gerard Brunton	GB Commtrade
Joseph Ebbage	Almond Board of Australia
Chaseley Ross	Australian Nut Industry Council Executive Officer
Quin Scalzo	Scalzo Food Industries
Michael Waring	MWT Foods
Lynne Ziehlke	Australian Macadamia Society

2016/17 contributors

We thank the following Nuts for Life contributors for their ongoing support:

- Almond Board of Australia and members
- Australian Macadamia Society and members
- Australian Pecan Growers' Association
- Australian Pioneer Pistachio Company
- Australian Walnut Industry Association
- Carroll Partners
- Charlesworth Nuts
- Chestnuts Australia Inc
- Commodity Imports Australia
- COTFoods
- FTA Food Solutions Pty Ltd
- GB Commtrade Pty Ltd
- Hazelnut Growers of Australia
- J.C.'s Quality Foods
- Maxwell Foods
- MWT Foods
- Nut Producers Australia
- The Nut Shop
- The Nut Stand Co
- Olam Orchards Australia
- Prolife Foods
- Rath & Co Trading
- Royal Nut Company
- Saker Consultants
- Scalzo Food Industries
- Select Harvests
- Stahmann Farms
- Sunbeam Foods
- Trumps Pty Ltd
- Trutaste Nuts Pty Ltd
- Walnuts Australia
- Yummy Snacks

Becoming a contributor

Companies and organisations across the nut value chain are welcome to join Nuts for Life. Growers, importers, packers, distributors, retailers, and grower and industry associations, with an interest in the promotion of good health through the regular consumption of nuts, are encouraged to join us in our efforts to increase nuts' share of the consumer stomach.

Nuts for Life fees are based on company tree nut sales. Fees for 2017/18 are:

- \$A 2,359 (ex GST) pa for sales of \$5 million or less pa
- \$A 5,307 (ex GST) pa for sales of \$5 – 7.5 million pa
- \$A 8,846 (ex GST) pa for sales of \$7.5 – 10 million pa
- \$A 11,793 (ex GST) pa for sales of \$10 million or more pa

Nuts for Life membership fees were maintained at the 2003 level until 2010 when it was agreed to apply a 4% CPI increase to keep the program viable. The real CPI growth from 2003–2010 was close to 20%. In 2011 the Management Committee further agreed to apply CPI growth each year to fees. Nuts for Life remains a good investment.
